DETAILED ACTION

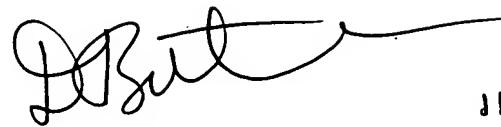

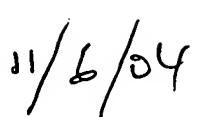

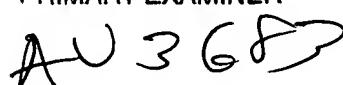

1. Claims 1-10 and 20-21 stand allowed. The submitted Abstract is acceptable.
2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
3. Claims 11-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed to essentially a program per se including a series of program codes. See MPEP 2106-2106.02.
4. Applicant's arguments in the responsive filed Sept. 2, 2004 have been considered but are not convincing in that the claim 11 is directed to a computer useable medium including essentially programs per se. The features of claim 1 lines directed to the brake applying feature are not accorded patentable weight. The examiner suggests applicant amend the claims to avoid the above rejection.

Although the examiner has no specific wording in mind to avoid the rejections, this action is not made final in keeping with guidelines set forth in MPEP 706.07 stating that applicant is entitled to a "full and fair hearing" on issues dealing with patentability. The examiner respectfully this opportunity to applicant. Note that the recitation in the preamble of claim 1 of "for...failure" is an intended to clause which does not carry any significance.
